CAREER OBJECTIVE

IT undergraduate pursuing a BSc (Hons) in Computing with growing experience in modern web development. Skilled in using React for building responsive and user-focused frontend applications, with a solid foundation in core web technologies. Currently expanding backend knowledge through Node.js and Express.js. Eager to gain hands-on industry experience through internship opportunities and grow further toward becoming a full-stack developer.

EDUCATION

BSc (Hons) Computing
London Metropolitan University (ICP College, Pokhara)
2024 – Present | Currently 5th Semester (3rd Year)

Higher Secondary Education (Science Stream)
SOS HGS Gandaki, Pokhara
2021 – 2023

TECHNICAL SKILLS

Frontend Development:
HTML5, CSS3, JavaScript (ES6+), ReactJS, Tailwind CSS, Responsive Design, Firebase, Figma, TypeScript(basic)

Backend & Database:
MySQL, Java , Node.js & Express.js (Currently Learning)

Data Science:
Python , NumPy, Pandas, ScikitLearn

API Integration & State Management

- **REST APIs** (fetching, handling JSON responses)
- **GraphQL** (basic understanding)

- **React State Management**
    - useState, useEffect, useReducer
    - **Context API**
    - **Redux Toolkit** (basic)
- API integration using **fetch / axios**

Tools & Platforms:
Git & GitHub, VS Code, Figma, Eclipse, IntelliJ IDEA, Linux, Jupyter

Others (Basic Knowledge):

SEO Certifications (Coursera), Django, Laravel, Docker(basic knowledge)

PROJECTS

Social Media Web App (React + Firebase + Tailwind)

- Developed a fully functional social media platform using React and Firebase for real-time authentication and data storage.
- Designed responsive UI components with Tailwind CSS for a smooth and modern user experience.

React-Based E-Commerce Site (API Fetching + React)

- Built a dynamic e-commerce frontend using React by fetching live product APIs to display items, categories, and product details with proper login and cart functionality.

Full Stack Dynamic E-Commerce Web App (Java + MySQL)

- Implemented backend functionality using Servlets, DAO, and MySQL database for product and order management.

Inventory Management System (Python)

- Created a command-line application to handle product transactions and generate invoices in file format.

LANGUAGES

Nepali (Native)
English (Fluent)
Hindi (Fluent)
Spanish (Intermediate)

STRENGTHS

- Passion for modern web technologies and visual design
- Quick learner and problem solver
- Excellent teamwork and communication skills
- Focused on clean, maintainable code and user-friendly experiences
